

# Stained “Glass” windows

## Materials:

- Stained glass outline picture (printed on vellum paper or drawn onto parchment paper)
- Markers or colored pencils (work better than wax crayons or paint)
- Colored tissue paper + glue stick

1. Choose the picture you want to decorate. Trace or draw it onto parchment paper or use vellum paper for a printed image.

2. Color with a translucent medium: markers, colored pencils, or leftover tissue paper stuck down with a glue stick (liquid glue causes the paper to crinkle)

3. Hang in a window so that daylight can shine through!
